

## Plugin For my journal

### Essential Plugins for Academic / Open Access Journals

| Purpose                 | Recommended Plugin                   | Why it's useful                               |
|-------------------------|--------------------------------------|---|
| Full journal management | OJS Plugin for WordPress (Scholarly) | Integrates submission system & peer review.   |
| Manuscript submission   | WPForms                              | Custom form with file upload for papers.      |
| Indexing / SEO          | Yoast SEO or RankMath                | Helps with Google Scholar visibility.         |
| PDF viewer for articles | PDF Embedder                         | Shows full papers inside the website.         |
| DOI generation          | CrossRef Reference Plugin            | Helps connect article metadata with CrossRef. |
| Security                | Wordfence                            | Protects the journal site.                    |
| Cache / Speed           | WP Super Cache or LiteSpeed Cache    | Makes article pages load faster.              |
| Backup                  | UpdraftPlus                          | Safely backs up articles & issues.            |
| Open Access Badges      | Open Access Button Widget            | Displays OA policy on homepage.               |

### Additional Optional Plugins:

- **Elementor** → For modern homepage layouts
- **TablePress** → For table of contents, issues & volumes
- **MailPoet** → For sending “New Issue Alerts” to subscribers
- **WP Statistics** → Track article downloads & visits
